EDUCATION

Masters of Science in Business Analytics, Arizona State University **Aug 2023 - May 2024**
Coursework: Data Visualization and Reporting (Tableau), SQL for Data Analytics, Statistical Analysis and Applied Statistics, Exploratory Data Analysis, Big Data Tools, A/B Testing, Deep Learning, Marketing Analytics.

BTech in Electronics & Communications, Gujarat Technological University **Aug 2014 - May 2018**
Coursework: Digital Signal Processing, VLSI Design, Control Systems, Embedded Systems, Analog Electronics.

SKILLS

Programming Skills	SQL, Python, Power BI, Pandas, Numpy, Spark, Athena, Hive, Matplotlib, PyTorch
Technical Skills	Business Performance Metrics, Analytical Support, Excel(VBA), Data Visualization, NLP
Certification	Google Project Management Professional

EXPERIENCE

Digital Supply Chain Analyst Intern | Avnet Inc. | Arizona **Jan 2024 - May 2024**

- **Risk Dashboard:** Designed and implemented an AI-driven interactive dashboard using Power BI, increasing supply chain efficiency by 25% by analyzing historical data to predict and mitigate disruptions.
- **Process Improvement:** Leveraged advanced data analytics and AI, optimizing supply chain processes, reducing decision-making time by 30%, and enhancing overall responsiveness and risk management.
- **Risk Analysis:** Conducted comprehensive risk analysis, identifying key vulnerabilities, reducing potential supply chain disruptions by 15% through predictive modeling and data-driven decision-making.

Staff Business Analyst, Sales Operations | Verizon Wireless | India **Jun 2022 - Jun 2023**

- **Dashboard Development:** Led collaboration with engineering, and sales teams to design Sales Operations dashboards using Python, improving efficiency by 20% and ensuring compliance across e-commerce channels.
- **Data-Driven Project Execution:** Managed projects using Agile and Scrum, improving **data stewardship** by 25% through advanced analysis, data mining, and automated dashboard reporting.
- **Operational Excellence:** Applied predictive analytics and data visualization using Python and Tableau, reducing **customer churns** by 10% and enhancing decision-making capabilities across systems.

Business Analyst, Sales Operations | Verizon Fios | India **Nov 2019 - May 2022**

- **CRM Analytics and Retention:** Optimized customer service with CRM analytics, Product Classification and SQL, achieving 95% retention by enforcing **operations** standards and proactive engagement.
- **Data-Driven Decision Making:** Analyzed customer data using **Tableau** and SQL, improving **customer retention** and decision-making accuracy by 20%, increasing satisfaction by 15%.
- **Operational Efficiency:** Enhanced KPIs and operational efficiency in sales and service delivery through data governance, automated testing, and **risk mitigation** strategies.

PROJECTS

Fake Review Detection in Online Platforms Using Yelp Dataset **Jan 2024 - Feb 2024**

- Led a project analyzing the **Yelp dataset**, using AI & Classification models, advanced **NLP** and text analysis techniques to detect fake reviews, enhancing online trust and integrity.
- Conducted comprehensive data preprocessing and exploratory analysis on **75,000+** reviews, identifying key variables and trends.
- Developed criteria to flag **fake reviews**, leveraging insights on timing, language, and rating patterns to improve business.
